

Trends

THE FUTURE OF SD-WAN →

The future of SD-WAN holds exciting possibilities.
Let's explore the trends shaping its evolution.

CLOUD-BASED SD-WAN

Businesses are migrating to the cloud, and cloud-based SD-WAN services offer easy deployment and management, aligning perfectly with this upward trend.

ENHANCED SECURITY

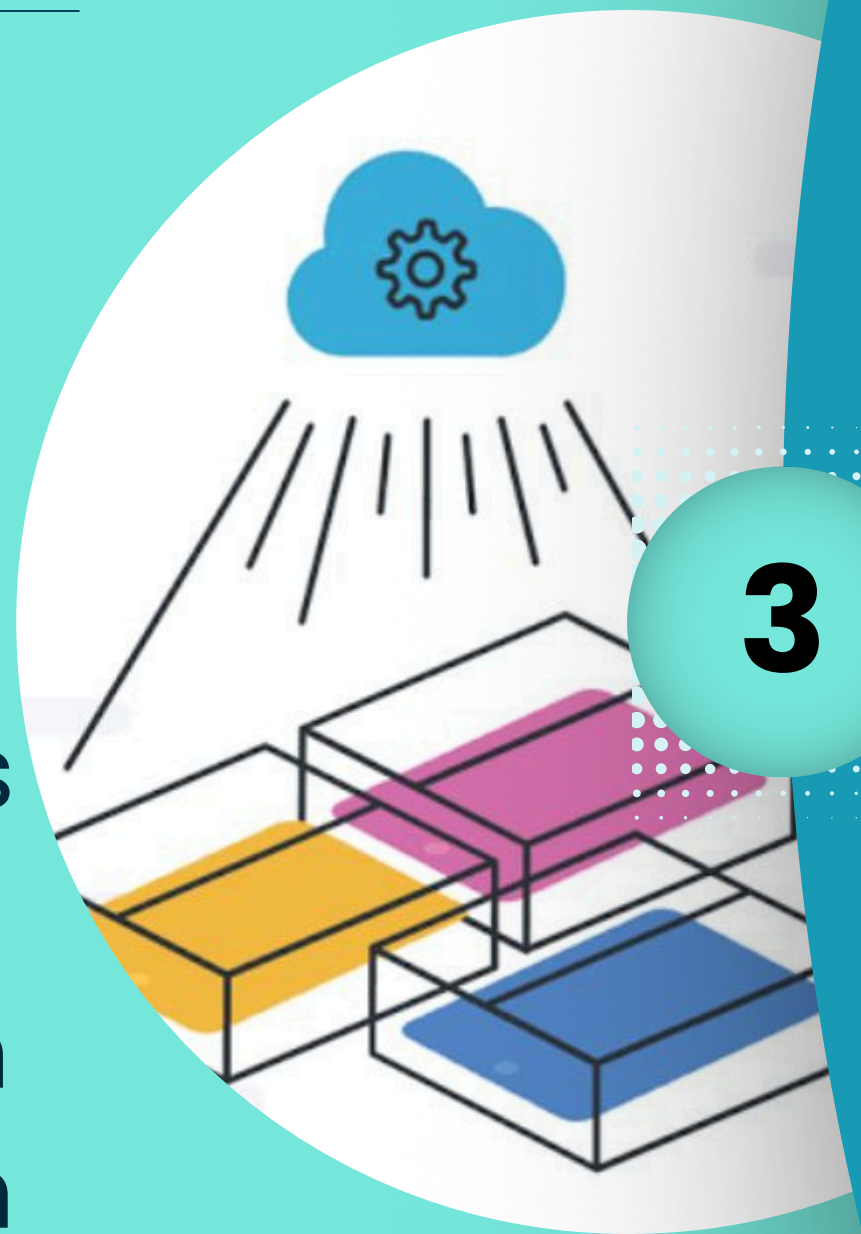

Advanced security options like firewalls and VPNs will become standard, ensuring robust protection for SD-WAN networks in the future.

2

ZERO-TOUCH DEPLOYMENT

Automation is key to the future of SD-WAN. Zero-touch deployment enables swift configuration and implementation with minimal human intervention.
